

THE SITUATION TABLE FOUR FILTER PROCESS

FILTER 1: Individual Agency Screening

This step happens
away from the table

Individuals within agencies, who have identified situations, where individuals and/or families are facing acutely elevated levels of risk, can complete the situation presentation form and submit it to the designated individual within their agency to be brought forward at the Situation Table.

Table representatives may bring forward situations from within their agencies, or from their community partner agencies

AT THE TABLE

FILTER 2: Determine Acutely Elevated Risk

First: Limited Follow-up from Prior Filter 4 Interventions

The Table is provided a high-level update by the lead agency and a determination is made whether the AER has been addressed. This is to tell the table if services have been connected or not and to close the situation if possible. No details of the intervention or follow-up services are discussed.

Second: New Situations Brought Forward from Filter One

Limited de-identified data is disclosed to determine if Acutely Elevated Risk is present.

No identified records are kept by the table. The only information captured is regarding risk and agencies involved.

OUTCOMES

More information is required before being able to determine risks present

More work needs to be done by the originating Agency

The Situation Table is a conversation, it is not an entity and does do handle case management.

FILTER 3: Limited disclosure, pause for recognition

Limited disclosure of information is presented to pause for recognition and to determine if (and if so, which) agencies are already engaged with the individual, based on the evident acute risk factors, and if (and if so, which) other agencies should play a role.

OUTCOMES

Determined agencies are actively engaged and services are moving forward so intervention not required

FILTER 4: The Outreach Engagement Intervention

Agencies involved will meet at the end of the meeting to discuss the next step, which should take place within the next **24 - 48 HOURS**. This intervention is not about enforcing or apprehending. It is about gaining express consent from the client in order to collaborate in offering full support and assistance that, in many cases, the clients were not previously aware of, able to obtain, or had access to.

POTENTIAL OUTCOMES

Wasn't interested initially, but then reached out

Open to Intervention—Consent Obtained—Services Connected

Not Interested—Sector-specific Options Remain for Consideration
